## B.Tech

# Artificial Intelligence & Data Science

Studying artificial intelligence opens a world of opportunities. At a basic level, you'll better understand the systems and tools that you interact with on a daily basis. ... In the field of artificial intelligence, the possibilities are truly endless.

**BILL GATES**

Co-founder of Microsoft

The power of artificial intelligence is "so incredible, it will change society in some very deep ways,"

**TIM COOK**

CEO of APPLE

For artificial intelligence to be truly smart. AI has great potential to improve the world we live in.

**GINNI ROMETTY**

CEO of IBM

Some people call this AI, but the reality is this technology will enhance us. I think we'll augment our intelligence.

**SUNDAR PICHAI**

CEO of GOOGLE

"AI is one of the most profound things we're working on as humanity. It's more profound than fire or electricity,"

**JEFF BEZOS**

CEO of AMAZON

It is a renaissance, it is a golden age. AI an "enabling layer" that will "improve every business.

**FEI-FEI LI**

STANFORD UNIVERSITY

AI is going to make us work more productively, live longer, and have cleaner energy.
